HD Channels underlined, with bold faced italic print  
and highlighted in light gray.

Updated February 2015

SPANISH Language channels in RED

FRENCH Language channels in GREEN

Low Power TV and Translator Stations in BLUE with Reduced Size

NOTES: CP = Construction Permit App = Application + = proposed new facility

Channel Numbers highlighted in yellow are considered fringe or deep fringe, requiring outdoor antenna & preamplifier.

Channel Numbers not highlighted can be assumed to be Local or Metro strength; often working with an good indoor antenna.

For purposes of a reference standard, and the fact that indoor reception varies dramatically with different construction materials, "fringe" and "deep fringe" signals will be those with a receive level lower than -75 dBm as measured at 30 feet above the ground. Signals lower than -100 dBm under same conditions are extremely weak, unpredictable, and therefore not listed.

Mileage given from TV transmitter for protected coverage service under average conditions at least 50% of the time.

d Notation after "Miles" indicates that the coverage pattern is directional, and overall numbers are approximate.

Actual coverage will depend upon terrain between the transmitter and receive location, as well as any local obstructions.

Distant reception can be enhanced with elevated antenna locations, as well as specialized antennas and preamplifiers.

Please note that there are a few low powered analog transmitters still on the air. Range is not calculated, but generally only a few miles.

Compiled by MIKE KOHL at GLOBAL COMMUNICATIONS in Plain, Wisconsin

Please E-Mail any corrections to: [globalcm@mhtc.net](mailto:globalcm@mhtc.net)

We appreciate any information found by local observation of live signals.

(especially if an analog station has finally gone off the air & replaced by digital)

NOTES: Digital channel assignments shown. Unless a different replacement digital channel is listed, it should be assumed that channel is operating in analog on same TV channel until digital conversion takes place.

**SPECIAL NOTE:**

The British Columbia charts are badly in need of additional input from local observers in B.C.

The 2012 shutdown of many CBC transmitters has led to much confusion about what is still on the air in remote locations.

Sheer volume in the number of locations, plus the fact that a number of communities now have their own private systems with new channels means that we need all the help that we can get from local viewers to update this information. The long rollout of digital conversion over the next several years will add to the confusion, but the plus side is that added new cable channels are being added to the mix in some communities that do not have conventional wired cable TV systems. Please send any input that you have to [globalcm@mhtc.net](mailto:globalcm@mhtc.net)
