HD Channels underlined, with bold faced italic print

and highlighted in light gray.

FRENCH Language channels in GREEN

Low Power TV and Translator Stations in BLUE with Reduced Size

NOTES: CP = Construction Permit App = Application + = proposed new facility

Channel Numbers highlighted in yellow are considered fringe or deep fringe, requiring outdoor antenna & preamplifier.

Channel Numbers not highlighted can be assumed to be Local or Metro strength; often working with an good indoor antenna.

For purposes of a reference standard, and the fact that indoor reception varies dramatically with different construction materials, "fringe" and "deep fringe" signals will be those with a receive level lower than -75 dBm as measured at 30 feet above the ground.

Signals lower than -100 dBm under same conditions are extremely weak, unpredictable, and therefore not listed.

Mileage given from TV transmitter for protected coverage service under average conditions at least 50% of the time.

d Notation after "Miles" indicates that the coverage pattern is directional, and overall numbers are approximate.

Actual coverage will depend upon terrain between the transmitter and receive location, as well as any local obstructions.

Distant reception can be enhanced with elevated antenna locations, as well as specialized antennas and preamplifiers.

Please note that there are a few low powered analog transmitters still on the air. Range is not calculated, but generally only a few miles.

A precise Custom Listing of stations available at individual addresses, including pointing coordinates and predicted signal levels is available for a nominal fee from Global Communications. Please see the example for DeForest, Wisconsin on our website at

www.global-cm.net
