

**FREE-TO-AIR  
MPEG-2 & MPEG-4  
Video & Audio Channels**

**C-Band Satellite  
Signals Received In  
Continental U.S.**

**Updated May 04 2015**

**Compiled by MIKE KOHL**

**140 to 70 West C-Band**

**Send correspondence to  
[globalcm@mhtc.net](mailto:globalcm@mhtc.net)**

Since 1998, I have been providing a free service to the satellite reception community, spending many hours compiling information on free digital signals transmitted via satellite. Recently I have had to make major changes in my life that greatly reduce the amount of time available for such projects. After a major rework to bring information up-to-date, future updates may be limited to once every 3 or 4 months, and we have simplified listings to make updating less time consuming. Most current satellite receivers now have great scanning abilities for finding new signals, so we will include polarity and frequency information along with symbol rates for transponders. Those needing detailed info such as exact PIDs are hereby directed to Lyngsat and other sources.

As a service to owners of the Manhattan RS-1933 satellite receiver, we will continue to make available a Preloaded Satellite, Transponder and Channel update approximately every 3 or 4 months for \$25.00. MAY 4, 2015 Update can be ordered and will be transferred via Email attachment.
